

# Michael Marconi

## Full Stack Web Developer | Software Engineer

Chicago, IL | 1.224.300.3699 | [Email](#) | [GitHub](#) | [LinkedIn](#) | [My Website](#)

### TECHNICAL SKILLS

---

**Front End:** React.js, Context API, Jest, Cypress, JavaScript, HTML, CSS, Ant Design  
**Back End:** Node.js, Express, SQL, PostgreSQL, Docker, Git CLI, GitHub, Vercel, Heroku, Netlify  
**Additional:** Agile Project Management, Algorithms, Architecture, Debugging, Deployment

### PROJECTS

---

**Si Beauty Bar, Full Stack Developer** - React | NodeJS | Express | Tailwind CSS | SQL | Azure [Project](#)

- Developed a React-based web application with features such as image carousel, form submission, and responsive design, integrated with Redux for state management.
- Developed a Node.js backend using Express, Azure SQL, and Docker to manage user authentication, including login and account creation, as well as form submissions. Integrated Nodemailer for email functionality and ensured cross-origin compatibility with CORS.

**Personal Business Website, Frontend Developer** - React | Node [Project](#)

- Developed a dynamic React application Node v16 showcasing gaming content and mentorship services, integrating Twitch and YouTube APIs for seamless access.
- Designed and implemented responsive UI components using state, and CSS, optimizing user experience across devices and screen sizes.

**Crypto Page, Full Stack Developer** - React | Node | Redux [Project](#)

- Developed responsive frontend components using React.js, including dynamic data fetching from REST APIs and integration of React Router for seamless navigation.
- Applied modern CSS techniques to enhance user interface consistency, accessibility, and responsiveness across React.js components.

**Shop Online New York, Full Stack Developer** - React | Node [Project](#)

- Spearheaded the development of "Shop Online New York," a robust e-commerce platform akin to Amazon, facilitating seamless buying and selling experiences for users.
- Collaborated closely with React, CSS, and backend teams within a startup environment, ensuring the smooth integration of frontend and backend functionalities to deliver a high-quality user experience.

### EXPERIENCE

---

**Outlier, Remote - AI Writing Evaluator** 2024 - present

- Evaluated and enhanced the quality of AI-generated content by assessing factuality, completeness, brevity, and grammatical correctness.
- Reviewed and provided feedback on the work of fellow writers, contributing to the continuous improvement of AI-generated writing standards.

**Shop Online New York, Remote - New York - Front End React Developer** 2023 - 2024

- Demonstrated proficiency in React.js to implement frontend functionalities, including dynamic user interfaces and responsive designs, optimizing the user experience.
- Regularly submitted comprehensive weekly Pull Requests (PRs) encompassing code enhancements, bug fixes, and feature implementations, accompanied by detailed video tutorials to aid team comprehension.

**Danny Z Entertainment, Chicago, IL - Full Stack Web Developer** 2018 - 2022

- Achieved 300% of sales target by researching markets and identifying new revenue-generating opportunities.
- collaborating with a team as a mentor for advertising a live show using HTML, CSS, JavaScript, and React.js
