Michael Marconi

Full Stack Web Developer | Software Engineer

Chicago, IL | 1.224.300.3699 | Michaelmarck117@gmail.com | github.com/mmarconi117 | linkedin.com/michaelmarck

TECHNICAL SKILLS

Front End: JavaScript, HTML, CSS, Tailwind, React.js, REST API, Context API, Java, MongoDB
Back End: Node.js, Express, SQL, PostgreSQL, Docker, Git CLI, GitHub, GitLab,
Additional: Agile Project Management, Azure, AWS, SaaS, Business AI Automation, Algorithms, Architecture, Debugging,

EXPERIENCE

Benchmarc Display - *Full Stack Developer* - PHP | JavaScript | MSSQL | Azure | DevOps | Legacy Modernization 2026 -Present

- Modernized legacy PHP 5.x and MSSQL (SAGE) ordering systems into modular, scalable web applications using React/Typescript, improving performance and maintainability across multi-tenant Benchmarc brand platforms.
- Designed and maintained dynamic product configuration logic, SKU mapping systems, and complex pricing validation workflows to support real time fixture customization and order processing.
- Led infrastructure improvements including Azure-based deployment planning, version control standardization, and CI/CD automation to streamline updates while maintaining live production environments.

TuneDraft - *Lead Full Stack Developer* - ReactJS | NodeJS | Express | Tailwind CSS | SQL | Azure | MongoDB 2025 - 2026

- Collaborated with a team to develop a full-stack music collaboration platform using React, Tailwind, Node.js, and Redux, enabling seamless artist and listener interactions.
- Designed and implemented a secure authentication system with OAuth 2.0, integrating AWS services for backend deployment and database management.
- Automated CI/CD pipelines to streamline updates, ensuring smooth deployment across GitHub repositories (private/public) and AWS infrastructure.

Shop Online New York - *Full Stack Web Developer* - ReactJS | NodeJS | Express | Tailwind CSS | SQL *2023-2024*

- Collaborated with a team and optimized dynamic user interfaces using ReactJS and NodeJS with MySQL, improving user engagement and satisfaction.
- Led code enhancements and feature rollouts, reducing backlog and accelerating feature delivery.
- Created video tutorials and documentation, streamlining onboarding and improving team comprehension of new features.

PROJECTS

Si Beauty Bar, *Full Stack Developer* - ReactJS | NodeJS | Express | Tailwind CSS | SQL | Azure | Docker

- Developed a React-based web application with features such as image carousel, form submission, and responsive UI/UX Design, integrated with Redux for state management.
- Developed a Node.js backend using Express, Azure, SQL, and Docker to manage user authentication, including log in and account creation, as well as form submissions. Integrated Nodemailer for email functionality and ensured cross-origin compatibility with CORS.

TuneDraft, *Full Stack Developer - ReactJS | Node | Redux* | Express | Tailwind CSS | MongoDB | *NoSQL | AWS*
(Code not shareable due to NDA)

- *Built and maintained responsive and dynamic UI components using React.js, Tailwind CSS, and React Router to deliver seamless user experiences.*
- *Implemented **Redux** for global state management, improving performance and enabling real-time updates across artist and listener interactions.*
- *Designed and integrated RESTful APIs using Node.js and Express, connecting frontend and backend logic across features like uploading, search, and messaging. Launched with AWS*

Shop Online New York, *Full Stack Developer* - ReactJS | Node

- Spearheaded the development of "Shop Online New York," a robust e-commerce platform akin to Amazon, facilitating seamless buying and selling experiences for users.
- Collaborated closely with React, CSS, UI/UX Design, and backend teams within a startup environment, ensuring the smooth integration of frontend and backend functionalities to deliver a high-quality user experience.

EDUCATION

BloomTech, *Graduate of the Full Stack Web Development Program*
BrainStation *Graduate of the Web Development Program*
Colorado State University, *Master's Degree*
